

I have been advised the FCC is evaluating the possibility of giving priority to LPFM stations at the expense of certain FM translator services, most specifically, K-LOVE. In my area, K-LOVE is heard on FM 94.3. Losing this transmission would be quite detrimental to our local community. K-LOVE offers our community "family-friendly" broadcasts that promote Christian values and messages that reinforce the need to treat people with respect and dignity. The fact that we live in a society that stresses/promotes the right to "free speech" even when the messages are filled with insults, humiliation, and the denigration of other human beings reinforces the need to allow a positive-message station like K-LOVE to continue its transmissions nation-wide. Please reconsider allowing LPFM's to replace FM translator services, such as K-LOVE, that promote family values and decency. THANKS!
